1 JUN 1985

Kissinger

Henry - This is the story on our conference starting June 25th. It would only require appearing on the evening of that day.

We can provide our studies on the Soviet Approach to Arms Control on which we have two recent extensions - information on the campaigns against the Neutron bomb, INF + SDI as well as information on other active measures and propaganda apparatus, although you don't need all of that.

Give me a call on Monday

Bill
